

Network Cabling

TAYLORED SYSTEMS

[Network cabling](#) forms the backbone of your telecommunications infrastructure. This system of cables and hardware enables telephone service, data transmission, IP cameras, and card access systems. Ensuring optimal performance requires adherence to standards set by the American National Standards Institute (ANSI) in conjunction with TIA/EIA.

Given the critical role of network cabling in your voice and data network, it's essential to select a qualified provider. Taylored Systems specializes in structured network cabling, with certified installers who complete projects to TIA/EIA-568 C, IEEE, and BICSI standards for peak performance.

At Taylored Systems, we deliver physical-layer infrastructures designed to meet today's standards, supporting all your applications. Our network cabling solutions use only high-quality products, backed by manufacturer warranties ranging from 15 years to a lifetime, depending on the manufacturer.
